If you run a contractor shop or local service business, you probably do not want to piece together a website from five different vendors. You want one setup that covers design, hosting, updates, and support, and you want to know what is included every month.

That is the idea behind the monthly plans from Scalable Websites. The company is based in Montgomery, TX, and focuses on mobile-first websites for contractors, home service businesses, and local small businesses. That includes trades like roofing, HVAC, plumbing, fire protection, fencing, concrete coatings, pools, septic, landscaping, remodeling, and general contractors, along with 30+ more.

For business owners looking for a website designer Montgomery TX companies can work with long term, the monthly plan model keeps things simple. Instead of paying for a website and then figuring out hosting, maintenance, and support later, those pieces are built into the plan from the start.

What is included in every monthly plan

Every plan covers the core items most service-area businesses need on day one. The websites are mobile-first, which matters when a customer is standing in the driveway searching on a phone. Each site also includes click-to-call, Google reviews shown on the site, custom lead forms, and on-page SEO from day one.

The lead forms are set up with instant text and email alerts, so inquiries do not just sit there waiting. Hosting and security are also included, which helps keep the site managed in one place.

Website maintenance is a big part of the offering too. That includes unlimited update requests, security updates, uptime monitoring, daily offsite backups, and a dedicated project manager. For many owners, that is the part that removes the most stress. If you need something changed, updated, or checked, there is a process for that.

This setup can make sense whether you need contractor website design for a new company or a website redesign for an existing one. It is also a practical fit for small business website design when the goal is to stay current without managing technical tasks yourself.

How the three plans are structured

The monthly plans are built around how much website you need and how much support your business wants around lead handling and growth features.

- **Starter - $95/month:** Single-page site.
- **Growth - $195/month:** 3 to 5 pages, missed-call text-back, unlimited lead follow-up, Search Console, and Google Analytics.
- **AI Enhanced - $295/month:** 10+ pages, blogging, priority support, AI SMS and chat, and SEO citations.

The Starter plan is the simplest option. It is a fit for businesses that need a clean online presence with the essentials in place. If your goal is to get online with a professional page that covers the basics, this is the entry point.

The Growth plan adds more room to explain services across multiple pages. It also adds missed-call text-back and unlimited lead follow-up, which can help businesses stay responsive when calls come in during the workday. Search Console and Google Analytics are included here as well.

The AI Enhanced plan is the most built-out option. It includes 10 or more pages, blogging, priority support, AI SMS and chat, and SEO citations. For businesses that want a larger site structure and more communication features, this plan gives more to work with.

What the monthly terms mean for business owners

Every plan has a 6-month minimum, then it goes month-to-month. That is worth understanding upfront, because it is not a one-time build with no ongoing relationship. The monthly model is meant for businesses that want the site managed over time.

There is also a 30-day money-back guarantee on signup. That gives new clients a clear starting point if they are comparing options for web design Montgomery TX or web design The Woodlands providers.

Another important point is ownership. The client owns the site after 36 months. There is also a free design refresh every 36 months. For business owners, that means the website is not meant to sit unchanged year after year. It is built to be maintained, updated, and refreshed as the business keeps moving.

That matters for service companies especially. Phone numbers, service areas, reviews, forms, and page content all need attention over time. A website that is ignored usually starts to feel outdated fast.

Who these plans are built for

Scalable Websites works with service-area businesses and meets clients in person across Montgomery County and greater Houston. That includes Montgomery, Magnolia, The Woodlands, Conroe, Willis, Spring, Tomball, Cypress, Kingwood, Humble, Houston, Katy, and Sugar Land.

The company was founded in January 2025 and is veteran-owned. Owner Preston Toor leads a team that brings 10+ years of experience and 200+ websites built for home service businesses. That background shows in the way the plans are structured. They are not padded with extras that do not matter to a local contractor. They focus on the website itself, lead capture, **website redesign montgomery tx** maintenance, and support.

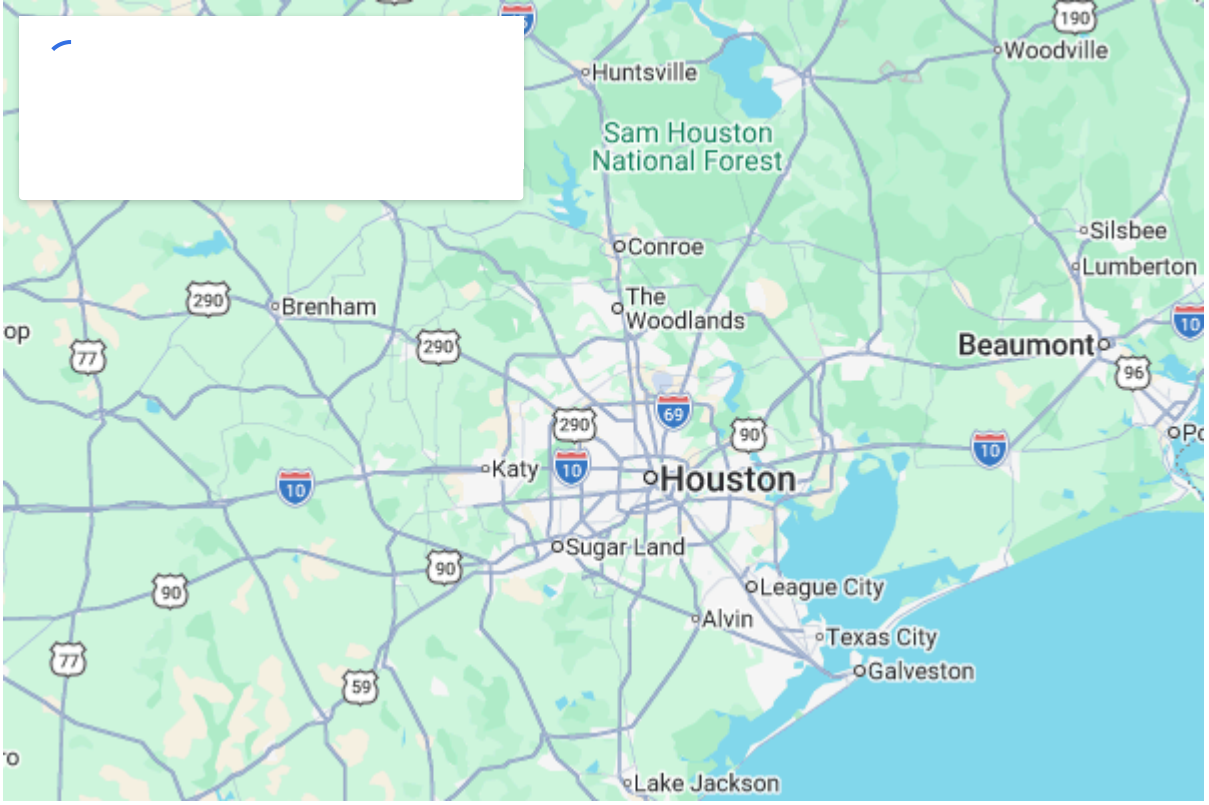

If you have been looking at small business website design options and wondering what you are really paying for each month, the answer here is pretty straightforward. You are paying for the site design, the hosting and security, the updates, the backups, the monitoring, and a support setup that is already in place. For contractors and local service businesses, that can be a lot easier to manage than trying to hire one person for design, another for hosting, and another for website maintenance.

Scalable Websites also has a 5.0-star Google rating, and the company is open Monday to Friday, 8 AM to 5 PM.

Scalable Websites, based in Montgomery, TX. (832) 979-2478.
