- **Mind Games and Bluffing:** In live or video-based gaming settings, spoken cues, body language, and pacing can influence a challenger's option. For example, subtly gesturing toward one hand can deceive a challenger into countering a relocation you never planned to make.
- **Track Your Opponent:** In multi-round matches, keep psychological or physical notes of your opponent's tendencies. Do they prefer Paper? Do they always change after a loss? Exploit these specific habits.
