Plinko Crypto is a digital version of the standard gambling establishment and game-show game, adapted particularly for online casinos that accept cryptocurrencies like Bitcoin (BTC), Ethereum (ETH), Tether (GBPT), and Litecoin (LTC).

At its core, the game is extremely easy:

1. The gamer sets their bet amount and drops a ball (or "puck") from the top of a triangular grid filled with pegs.
2. As the ball falls, it bounces randomly off the pegs.
3. It eventually lands in among the slots at the bottom, each carrying a various multiplier value.
4. The gamer's payment is computed by increasing their original bet by the multiplier of the slot where the ball lands.

Unlike skill-based video games like poker, Plinko is a game of pure possibility. However, the rise of "Provably Fair" technology in crypto casinos has given players a level of openness that traditional online gambling just can not match.
