The main goal for a gamer is to anticipate which segment the wheel will stop on. Nevertheless, the video game goes far beyond easy guessing; it introduces a leading slot that spins in tandem with the primary wheel, potentially granting enormous multipliers to routine numbers or bonus offer rounds on each and every single spin.

The Betting Layout

Before each round starts, gamers have a minimal time to place their chips on the wagering grid. The board consists of eight distinct wagering options, split between numeric payments and reward video games.

Bet Type Sections on Wheel Payout Odds Description **1** 21 1:1 The most common segment on the wheel. **2** 13 2:1 Offers double the stake on a win. **5** 7 5:1 A mid-tier number bet. **10** 4 10:1 The least regular numerical bet.

Understanding the Bonus Rounds

The main tourist attraction of Crazy Time depends on its four reward rounds. While numeric bets keep the balance ticking, the reward video games provide the capacity for the most considerable payouts, occasionally reaching up to 20,000 x the gamer's stake.

- **Coin Flip:** A virtual coin with a red side and a blue side is flipped by the speaker. Each side gets a random multiplier before the flip. Whichever side lands face up awards that multiplier to the gamer's bet.
- **Cash Hunt:** Players are provided with a screen displaying 108 random multipliers hidden behind shooting targets. Utilizing a virtual cannon, the player chooses a target, revealing their multiplier.
- **Pachinko:** A radiant puck is dropped from the top of a Pachinko wall filled with pegs. The puck bounces down till it lands in among the multiplier slots at the bottom. If it strikes a "Double" slot, all multipliers on the

board double, and the puck is dropped once again.

- **Crazy Time:** Players get in a virtual world behind a huge red door including a gigantic 64-segment wheel. The player picks among three flappers (green, blue, or yellow). The wheel is spun, and whatever multiplier the picked flapper points to is granted. If it arrive at "Double" or "Triple," all multipliers increase, and the wheel spins once again.
