What is Big Bass Crash?

At its core, Big Bass Crash is a multiplayer "crash game"-- a category that has risen in appeal at online crypto and fiat casinos alike. Unlike standard slot video games where gamers spin reels and wait on paylines, crash games are developed around a rising curve.

In Big Bass Crash, an angler boards his boat and casts his net into the water. As the boat progresses, a multiplier starts ticking up from 1.00 x. The goal for the gamer is easy yet painful: **money out before the net breaks or the action crashes.**

If a gamer squanders in time, they win their stake multiplied by the current value. If the game crashes before they cash out, the bet is lost.

Key Features and Mechanics

1. The Cashout Feature

Players have total control over when to gather their earnings. They can go with an early, safe cashout or hold on for higher multipliers, risking it all for a massive payout.

2. Auto-Cashout and Auto-Bet

Since split-second timing is vital, the game includes automation tools. Players can set a predetermined multiplier (e.g., 2.00 x) at which the game will instantly cash out their payouts. Similarly, auto-betting allows players to automate consecutive rounds.

3. The 50% Cashout Option

Among the standout functions of Big Bass Crash is the ability to squander 50% of the bet while letting the remaining 50% trip. This hybrid method allows gamers to secure their initial stake (or lock in some earnings) while keeping skin in the game for a potential peak multiplier.
