- **Inspect Obstructions:** Take note of ceiling fans, air vents, smoke alarm, and lighting fixtures. The top bunk should be safely away from any spinning fan blades or electrical fixtures.
- **Confirm Floor Space:** Map out the footprint of the bed, making sure that doors, closets, and drawers can still open fully once the big frame is in place.
- **Pick the Right Mattress:** Bunk beds need specific bed mattress densities-- generally between 5 to 7 inches for the leading bunk-- to ensure the safety guardrails stay reliable. A mattress that is too thick will minimize the height of the guardrail, developing a fall risk.
