Hose Bros Inc If yours is a constructed home, choose a brighter color (distemper) for kitchen; for a brighter kitchen lightens up the mood and appears wide.Get the cabinets done up in plywood in its original splendor above dado but with softer look. Same pattern goes well on the lower row below the platform. Make sure you dont leave corners uncabineted from both aesthetic and hygiene point of view. Mind you, the bottom line of upper cabinets must be well above your full standing height.Standard height for dado is 2 above the platform, but there is no reason why it should be so. Take it as high as to touch the bottom of upper cabinets. This avoids the unpleasant strip of blank space between them. Next, the dado must match both upper and lower cabinets in dcor. If you chose plywood for cabinets, stainless steel in mat finish would look great. While mat finish is pleasant on eyes, steel good for hygiene. Other option is ceramic tiles.Plan crockery showcase near dining table to avoid the odd look if made in glass panes. This also adds to convenience and doesnt clutter the main kitchen area.You must have the chimney concealed within the cabinet if the cooking spot is along a wall. A hanging chimney goes well too, provided it is encased. The best places for faucet and sink are close to the stove and along the exterior wall.If the sink is on your left, have the fridge and oven on the right, purely for convenience sake.
