- **The High-Risk Sniper:** Aim for the severe external edges by setting the game to High Risk and 16 rows. Gamers using this method accept frequent little losses in exchange for the chance of hitting an enormous 500x or 1000x multiplier.
- **The Martingale Adaptation:** (Use with extreme care!) Doubling the bet size after every loss in an effort to recover previous losses when a win lastly hits. Since Plinko has multi-tier outcomes instead of a simple 50/50 win/loss split, this strategy can quickly diminish a crypto bankroll if a cold streak hits.
