- **How it works:** Players set an automatic cash-out point at a very low multiplier, such as **1.20 x to 1.35 x**.
- **The Pros:** Statistically, a crash game endures previous 1.20 x the bulk of the time. This yields frequent, steady wins.
- **The Cons:** When a 1.00 x crash (immediate bust) takes place, it eliminates numerous previous small wins.

2. The Martingale System

- **How it works:** A traditional wagering method where a player doubles their bet after every loss. When they eventually win, they recuperate all previous losses plus a revenue equal to the original base bet.
- **The Pros:** Can be effective over short sessions with a repaired target multiplier (e.g., 2.00 x).
- **The Cons:** Requires a massive bankroll. A string of 6 or 7 successive 1.00 x crashes can entirely diminish a player's funds due to rapid development.

3. The Reverse Martingale (Paroli System)

- **How it works:** Doubling the bet after every *win* and resetting to the base bet after a loss.
- **The Pros:** Capitalizes on winning streaks without running the risk of big quantities of personal capital throughout losing streaks.
- **The Cons:** Relies totally on hitting consecutive winning rounds.
