What is the Aviator Game?

At its core, Aviator is a social multiplayer casino game coming from the "crash game" category. Unlike standard casino video games where gamers spin reels or bet a dealer in real-time cards, Aviator includes a quickly ascending airplane.

As the airplane takes off, a multiplier coefficient begins to increase-- starting at 1.00 x and possibly reaching infinity. The objective is deceptively basic: players place a bet before the round begins, see the plane ascend, and hit the **"Cash Out"** button before the aircraft arbitrarily flies away. If a gamer successfully cashes out before the crash, they win their preliminary stake multiplied by the current multiplier. If the plane flies away (crashes) before they cash out, the bet is lost.
