A CS2 casino is an online gambling place that utilizes **Counter-Strike 2 skins** (or related virtual items) as the primary currency. Rather of traditional cash, gamers deposit skins gathered from the video game's market, then wager them on:

Game Type	Description	Common Return-to-Player (RTP)
Skin Roulette	A spinning wheel with colour-coded slots; players wager a skin on red, black or green.	96-98%
Crash	A multiplier chart that climbs until it "crashes." Players cash out before the crash to lock in payouts.	95-97%
Coin Flip	Two-player head-to-head; each wagers a skin and a coin is flipped.	98-99% (minus house edge)
Match Betting	Predict the outcome of professional CS2 matches or specific maps.	90-95% (differs by odds)
Jackpot/ Case Opening	Gamers buy a virtual case; a random skin is awarded, in some cases worth more than the entry charge.	90-94%
