Platform designers generally program specific drop rates (possibilities) for different tiers of products. While exact portions differ depending upon the platform, a standard rarity hierarchy usually uses.

Typical Item Rarity Tiers

Tier Rarity Level Approximate Drop Rate Description **Tier 1** Common/ Consumer ~ 79.9% Basic products with basic styles and low market worth. **Tier 2** Uncommon/ Industrial ~ 15.9% Slightly more comprehensive items, still really typical. **Tier 3** Uncommon/ Mil-Spec ~ 3.2% Noticeable visual upgrades; standard staples of many stocks. **Tier 4** Categorized/ Restricted ~ 0.64% Highly stylized items with unique visual styles. **Tier 5** Covert/ Classified ~

0.13% Premium items; highly demanded by collectors. **Tier 6** Special/ Exceedingly Rare ~ 0.26% (Total for leading tier) Ultra-rare items, such as knives, gloves, or secret drops.
