What Is a CS: GO Case Battle?

A **Case Battle** is a gamified kind of skin gambling where 2 or more players agree to open the exact same variety of similar CS: GO cases at the very same time. Each player gets a random set of skins based on the case's built-in drop table. The aggregate market worth of the skins each gamer gets determines the winner:

- **Winner-takes-all:** The gamer with the highest total worth wins the whole deposited amount (minus a house fee).
- **Split-prize:** Some formats divide the pot proportionally based on the worth each participant receives.

Since the outcome hinges on the RNG (random number generator) ingrained in the video game's case system, Case Battles are basically a contest of luck, though some participants employ bankroll-management techniques to prolong play.

2. **Select a Battle Type**-- Options generally include 1v1, 2v2, or "Royale" (several participants).
3. **Deposit Skins or Real Money**-- Most platforms accept either in-game skins (converted to website credit) or fiat currency.
4. **Select Cases**-- All individuals agree on a particular CS: GO case (e.g., **Clutch Case**, **Revolver Case**) and the number of cases to open per gamer.
5. **Synchronised Opening**-- The platform runs the open animation for each player at the exact same time.
6. **Value Calculation**-- The system sums the marketplace price of every skin gotten (using real-time Steam market data).
7. **Payout**-- The winner receives the combined pot, minus a commission (generally 5-10%).

The "provably fair" algorithm utilized by respectable sites makes sure that the result can not be controlled after the battle begins.
