FactorDescription **Drift Value**The wear level (Factory New, Field-Tested, etc). Lower float values often lead to sharper finishes and greater desirability. **Pattern/ Finish**Special finishes such as "Fade," "Case Hardened," or "Gamma" can produce special visual patterns that differ per product. **Memento & StatTrak™**

Souvenirversions (released in tournament packages) and StatTrak™-equipped skins are normally rarer than their basic equivalents. **Event-Exclusivity**Skins released just during limited-time occasions, such as the **Boston 2018** or **Katowice 2015** collections, seldom appear in more recent case drops. **Supply Cap**Some skins were produced in a limited variety of cases before a collection was retired, lowering their long-term supply. **Rarity Tier**The in-game rarity system (Consumer, Industrial, Mil-Spec, Restricted, Classified, Covert, Rare Special Item) appoints a base rarity; greater tiers (Covert, Rare Special) often coincide with higher market price.
