- **The Conservative Approach:** Focusing mostly on the numbers 1 and 2. Due to the fact that these segments cover more than half the wheel, gamers adopting this style experience more regular, smaller wins that help sustain their bankroll over a longer session.
- **The Bonus Chaser:** Placing wagers exclusively or heavily on the four perk rounds (Coin Flip, Cash Hunt, Pachinko, and Crazy Time). This design accepts the threat of regular dry spells in exchange for the possibility to take part in the video game's highest-paying interactive functions.
- **The Coverage Strategy:** Spreading bets throughout several numbers and benefit rounds simultaneously. This guarantees that the player strikes *something* on a vast bulk of spins, though the cost of covering numerous sections can eat into the net profit of smaller wins.

The Role of the Top Slot

Adding another layer of excitement-- and tactical consideration-- is the **Top Slot**. Found directly above the main cash wheel, this two-reel slot spins all at once with every round of the video game.

1. **Reel 1** display screens one of the betting sectors (a number or a bonus offer game).
2. **Reel 2** displays a multiplier (ranging from 2x as much as 50x).

If the 2 reels line up horizontally to form a match, a multiplier is used to that specific bet or perk round for the upcoming spin. If that section wins, the payment is increased appropriately.

- **For numbers:** The basic payment is increased straight (e.g., a winning '5' struck with a 10x Top Slot multiplier results in a 50:1 payout).
- **For bonus offer rounds:** The multiplier is brought into the benefit game, quickly enhancing the baseline values of all the sectors or multipliers inside that mini-game.

3. Pachinko

The puck bounces arbitrarily up until it settles at the bottom in among numerous multiplier slots, or in a "DOUBLE" slot which doubles all multipliers on the board and triggers a drop-again.

4. Crazy Time

The crown gem of the game. The host opens a red door resulting in an enormous virtual wheel behind the primary studio. Gamers select one of three flappers (Green, Blue, or Yellow). The wheel is spun, and whatever multiplier the selected flapper indicate is awarded. If the flapper lands on "DOUBLE" or "TRIPLE," all multipliers on the wheel are doubled or tripled, and the wheel spins once again-- possibly reaching up to the game's maximum cap of 20,000 x.
