What is a CS2 Case Battle?

At its core, a **Case Battle** is a multiplayer variation of standard case opening. Hosted on third-party skin gaming and trading websites, a case battle enables two or more players to acquire and open the exact same set of cases simultaneously.

Rather of one gamer opening cases in isolation, a shared lobby is developed. Both (or all) players open their picked cases round by round. The system tracks the monetary worth of every skin dropped during the fight. When the last case is opened, the overall value of all skins dropped for each player is tallied. **The player with the greatest overall combined worth wins the entire contents of the pot**-- indicating they keep their own drops *plus* the drops of their opponents.

A lot of platforms provide numerous video game modes to keep the action fresh:

- **Free-for-All (FFA):** Three or more players battle, with the highest total worth taking whatever.
- **2v2/ Team Battles:** Players pool their resources and worths together to defeat a competing team.

- **Terminal/Sudden Death Battles:** Special modes where specific guidelines dictate the winner, such as the person who unboxes the lowest-value product winning the pot instead.
