Samsung Galaxy phones are everywhere in Northamptonshire, from the slim A series that many people pick up on a contract to the larger flagship models with curved displays. They are well built, but they are not immune to drops, and a Galaxy with a cracked screen or a tired battery deserves proper attention. Free Fusion in Corby repairs Samsung Galaxy handsets alongside its iPhone work, so Android owners are not an afterthought at the counter.

The most common Galaxy problems will sound familiar. Screens crack or develop coloured lines and dark patches after an impact, batteries stop lasting a full day, and charging ports become loose or fail to connect. Back glass can smash as easily as the front, and water finds its way into any phone left in a pocket during a downpour. Free Fusion covers screen replacement, battery replacement, charging port replacement, back glass and chassis work, camera glass replacement and water damage diagnosis across the Galaxy range.

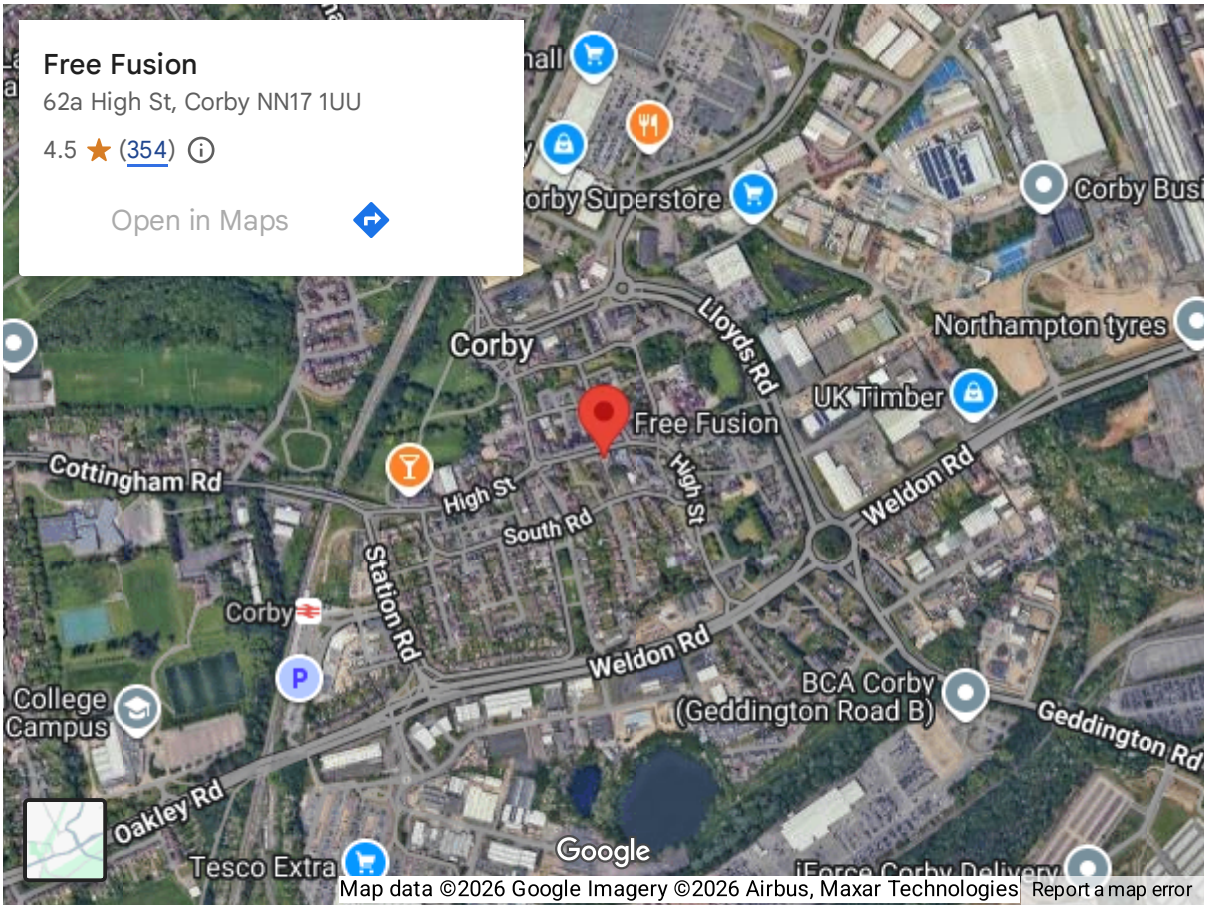

One thing worth knowing is that curved and AMOLED displays behave differently from flat ones. A faint green or pink line down the screen, or a patch that stays black while the rest works, usually means the display panel itself has been damaged, even if the glass looks intact. That is a screen replacement rather than a minor fix. The reverse can also be true, where a cracked surface leaves the display working perfectly, so a diagnostic check is a good way to see what is really needed before spending anything.

Free Fusion | 62a High St, Corby NN17 1UU | 01536 260 558

Free diagnosis is offered to local customers, and the shop gives you the price for your particular model before any work begins. Prices listed for iPhones start from £24.99 for a screen and £19.99 for a battery, but Samsung repairs Free Fusion Mobile Phone Repair Near Me are quoted individually because models vary so much, so please ask. Most repairs are done the same day, and many smartphone screen and battery replacements take about an hour at the Corby centre. Every repair is backed by a warranty.

Until you get in, take simple precautions. Put a piece of clear tape over a cracked screen to stop glass lifting, switch off the phone if it has taken in water, and back up your photos and contacts to your Samsung or Google account if it still responds. Customers regularly come in from Weldon, Gretton, Rothwell and Kettering, which is handy to know if you have been typing mobile phone repair near me into your search bar and want a local shop that treats Android and Apple handsets with the same care. To discuss your Galaxy, call 01536 260 558 or walk in to 62a High St, Corby.

FAQ About

Mobile Phone Repair Near Me How much does it cost to fix a broken phone? The cost depends on the device and the fault. At Free Fusion in Corby, iPhone screens start from £24.99, batteries from £19.99, charging ports from £19.99 and back glass from £50. Local customers also get a free diagnosis, so you know exactly what is wrong before you commit to a repair. How can I trust a phone repair shop? Look for a shop with a visible track record, a real address you can walk into and repairs that come with a warranty. Free Fusion has more than a decade of repair experience, a shop at 62a High St in Corby and a 4.7 out of 5 rating on Trustpilot from almost 500 reviews. Ask any shop to explain the fault in plain English before they start, and call us on 01536 260 558 if you want to check anything first. Where is the best place to get an iPhone repaired? The best place is a specialist that does the job properly, quickly and at a fair price. Free Fusion is an independent repair centre on the High Street in Corby, and most iPhone screen and battery replacements are done within about an hour while you wait. We are an independent repair specialist, not an Apple Store, and common repairs such as batteries and charging ports start from just £19.99. Can a water damaged phone be fixed? Often it can, but speed matters. Switch the phone off, do not charge it and bring it to a repair centre as soon as you can. Free Fusion offers water damage diagnosis and liquid recovery from £9.99, and local customers in Corby get a free diagnosis so you know where things stand. Do you offer same day mobile phone repair in Corby? Yes, most repairs at Free Fusion are completed the same day. Common jobs such as screen and battery replacements usually take about an hour, so you can often walk in, wait and leave with a working phone. Call 01536 260 558 to check availability for your model. Do I need an appointment for a phone repair near me in Corby? No, we offer a walk in service at our centre at 62a High St, Corby, open on weekdays and Saturdays. If you would like to check we have your part before you travel, a quick call to 01536 260 558 is the best way to be sure. What phones and devices can Free Fusion repair? We repair iPhones from the iPhone 5 up to the 17 series, plus iPads, Apple Watches, MacBooks and laptops. We also work on Samsung Galaxy, Google Pixel, Huawei, OPPO, OnePlus, Sony, Nokia, HTC and Honor handsets. If your device is not on that list, give us a ring and we will tell you honestly whether we can help. Can I send my phone for repair if I do not live in Corby? Yes. Free Fusion offers a postal repair service across the UK using Royal Mail and DPD. Posted devices are typically tested and dispatched the same day they arrive, so you are not left waiting long. Is there a warranty on phone repairs? Yes, repairs at Free Fusion are backed by a warranty. Ask the team about the terms for your specific repair when you drop in or call 01536 260 558, and keep your repair receipt safe in case

you ever need it. Do you repair phones for businesses and schools around Corby? Yes, we look after business phones, tablets and school devices as well as personal handsets. Fast turnaround matters when a device is needed for work or lessons, and our same day service helps keep downtime low. We also see customers from Kettering, Rothwell, Desborough, Weldon, Gretton, Oundle and nearby villages.
