2. The Split Strategy (Using Dual Bets)

- **How it works:** Place 2 equivalent bets on the very same round. Set the first bet to auto-cashout at 2.00 x to cover the overall expense of the round. Let the second bet trip by hand to chase greater multipliers (5x, 10x, or more).
- **The Goal:** Secure a break-even or small revenue on every successful round while preserving direct exposure to enormous payouts.

3. The 50% Safety Net

- **How it works:** Utilize the partial cashout function. As quickly as the multiplier hits 1.5 x or 2x, money out 50% of the stake.
- **The Goal:** Remove the threat from the table early, letting the remaining half of the bet function as a "complimentary roll" for the rest of the round.
