What is the Rock Paper Scissors Gambling Game?

- **Rock** squashes Scissors.
- **Scissors** cuts Paper.
- **Paper** covers Rock.

When cash is included, participants normally buy into a pot, play a best-of-three or best-of-five series, and the winner takes the money. Traditional Play vs. Gambling Play

Feature	Traditional Playground Game	Competitive Gambling Game
Primary Goal	Enjoyable, settling small disagreements	Financial gain, competitive status
Stakes	Pride, boasting rights	Money, crypto, or important prizes
Format	Usually single-throw	Multi-round series (Best of 3, 5, or 7)
Psychology	Casual guessing	Advanced behavioral profiling, video game theory

The Mathematics and Odds: Is It Pure Luck?

Mathematically, a single round of Rock, Paper, Scissors against a totally randomized challenger is a **uniform circulation video game**.

- **Possibility of any single move:** 33.33% (1 in 3)
- **Probability of a tie:** 33.33%
