1. Risk Level Settings

Most crypto Plinko variants permit players to choose between three risk levels:

- **Medium Risk:** A balanced method where the middle slots offer moderate returns and the outer edges provide higher multipliers.
- **High Risk:** The center slots will often lead to a bottom line on the bet, however the far-edge multipliers can be huge (often up to 1000x or more). This setting is customized for thrill-seekers.

2. Number of Rows

Gamers can normally adjust the board size by choosing the variety of rows (usually ranging from 8 to 16).
